OBJECTIVE

Computer Science and Engineering student with practical experience in data analytics, academic projects, and dashboard development. Skilled in Python, Excel, Power BI, and SQL concepts. Seeking an entry-level role where analytical thinking and technical skills can support business decisions.

PROJECT EXPERIENCE

1) ACADEMIC PROJECT

Dynamic E-Commerce Platform with FSM-Based Product State Management

Developed a full-stack e-commerce platform implementing Finite State Machine (FSM)-based product lifecycle management to handle inventory states such as available, reserved, and sold

IoT-Based Road Damage Detection and Alert System

An IoT-Based Road Damage Detection and Alert System detects potholes and road damages in real time using sensors and GPS technology, then sends alerts to authorities for faster road maintenance and improved safety.

Pharmacy & Medicine Inventory

Developed a Pharmacy & Medicine Inventory Management System with integrated billing to automate stock tracking, sales recording, and invoice generation.

Real-Time Seat Allocation System

Designed and developed an advanced Airline Management System implementing FSM-based flight and booking workflows, real-time seat allocation, and automated ticket billing.

EDUCATION

- B.Tech in Computer Science and Engineering - SRM University - CGPA-6.7 (2023–2027)
- HSC - Velammal Bodhi Campus (2022–2023)
- SSLC - Maharishi Vidya Mandir (2020–2021)

SKILLS

- **Technical Skills:** Python, MySQL, Microsoft Excel, Power BI, HTML, CSS, Visual Studio Code
- **Certifications:** Python for Beginners – Coursera, Web Development – Coursera
- **Soft Skills:** Communication, Teamwork, Adaptability, Continuous Learning Mindset
